DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 5 I. Claims 1-21 are drawn to a method for converting a physical signature classified in class 713, subclass 180 (*Multiple Computer Communication Using Cryptography: Generating Specific Digital Signature Type*).
- II. Claims 22-28 are drawn to an electronic database classified in class 707, subclass 102 (*Database and File Management or Data Structures: Generating Database or Data*
- 10 *Structure (e.g., via user interface)*).

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination which employs both the physical signature conversion method and the electronic database

15 which stores the physical signatures. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because it discloses an electronic database which could be used in a number of applications.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated

20 is proper. A complete response to this requirement must include an election of the invention to be examined, even if the requirement is traversed.

Conclusion

A shortened statutory period for response to this action is set to expire one month (not less than

25 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
